The object of this company is to realize, with the Pan-Electric Company, its most admirable idea. i. c., to introduce inventions already made, and to develop vast fields of electric discovery through the united effort fas the original pamphlet expressed it? "of learned Electricians and skillful Mechanics," for the payment of whom company stock will be sold, having its value based not only on the new systems, but also "on the future possibilities of electricity," and on valuable properties already belonging to the Company.

"The Rogers Telegraph and Telephone Company," has secured the right to operate in the State of Pennsylvania, with her hundred towns and cities, "The Pan-hlectric Telephone," with a guarantee from the Parent Company to defend infringement suits, should any arise against it. This telephone has been introduced into New York by parties representing several million dollars, who give forty per cent, of their local stock and \$10 per annum royalty on each instrument to the Parent Company. Missouri and Texas have contracted to give the same, with \$20,000 cash bonus, and from the various States already sold over \$2,000,000 in money and local stock has been secured since January. The Pan-Electric Telegraph, under the judicious management of Gen. Joseph E. Johnston, presideat, and Senator Isham G. Harris, vice president, aided by an able directory, has also steadily increased the value of its stock.

"The Rogers Telegraph and Telephone Company" wows \$1,500,000 of the stock certificates of the Pan-Electric Companies—of course, its own stock must, independent of its own value, increase in value, as the Pan-Electric rock and other proporties belonging to it advance; and although the State of Fennsylvania might beem, at first view, to circumscribe its terrivory, its dividend, in point of fact, must arise from every and "American Postal Companies" prevail; for it also owns \$2,000,000 or a laboratory, and conveyed to "The Rogers Telegraph and Telephone Company," nor would it he extravagant to predict thatinven

Washington, D. C., January 5, 1884.

Dram Sir.—In reply to your question propounded in the note hereto attached, I beg to say; I have given the subject referred to much attention, and have closely examined several opinion delivered by different courts in controversies between 'the Bell Telephone Company, Dolbest, Spencer Chegan, and others, and I am clearly of opinion that the Pan-Electric, named by you, in no wise infringes the Bell Telephone. From the earliest decisions of our courts to the present, although inventions may in their general principles be allice, yet if in their operation and working there is an essential or material difference, there is no conflict to amount to an infringement. This is recomined in the historic case of O Reilly vs. Norse, 15 How., U. S. Reps., 62, and in numerous decisions since that; but more clearly, and with more direct application to the matter now in hand, in Clough vs. Manufacturing Company, 106 U. S. Reps., 178 (October term United States Supreme Court, 1882).

Without attempting any minute detail touching the inventions in question, I am satisfied thoroughly so—that the difference between them is wider and more distinct than that recognized by the court in the case 106 U. S. Reps., 389.

The courts hold that a "Substantial departure" from a former invention is patentable without infininging. (Daf see Stering Pump Co., 107 U. S. Reps. 636.)

This, in my judgment, is more than enough to Do not take our word for

The "Memphis Pan Electric Telephone Company" is now chartered and orranized.

Books of Sabscription to the capital stock of said Company, for the construction of Lines and the establishment of an Exchange in the city of Memphis, are opened and subscriptions will be taken by Mr. E. A. KEELING, at the Merchant's Exchange.

This stock is now offered for sale in shares of \$50 each, the proceeds to be faithfully applied to the construction of lines and other expenses incident to the establishment of an Exchange, and we recommend it as a good paying investment.

Subscriptions will also be taken by Mr. Keeling for Telephones, the price of same for the present to be not over \$45 per annum to business houses and \$50 for private residences, and if post ble to reduce this in the future it will be done.

No subscription for stock or for Telephones to be binding until at least 300 bona fide subscribers are secured for Telephones, thus guaranteeing to subscribers a fair-sized Exchange before asking for their money. Work to begin upon construction of lines, establishing and making connections as soon as 300 or more subscribers to instruments are obtained.

Stock subscriptions to be made payable as follows: 25 per cent in cash as soon as the abovementioned number of subscribers is obtained, and 25 per cent in three installments at 30, 60 and 90 days thereafter.

Subscriptions for Telephones to be due for the first year when instrument is placed in position.

Each subscriber for two shares of slock and who is also a subscriber for a Telephone, will have a reduction of \$50 n first year seest of Telephone and an additional two shares, thus securing the instrument at a reduced price for the first year, besides full participation in the general profits of the Company.

The great superleavity of these Telephones over all others is beyond.

participation in the general profits of the Company.

The great superlority of these Telephones over all others is beyond question. They are in operation and can be seen and tried at the Merchants' Exchange and Cotton Exchange, and more will be put up soon at other points.

We desire that this shall be a home centerprise, in which our own citizens shall have a voice and be interested. The lines will be put up in the best and most secure manner, taking advantage of all late inventions and improvements, and the public can rely upon having the very best of service.

The main lines through the different portions of the city will be cabled, and the entire work will be first-class, reliable and durable.

Mr. Keeling will call upon our business men and citizens generally, and we ask for your favorable consideration and co-operation.
